Business Description:  
Manufacturer of ergonomic  
technology mounting solutions

Turnover  
€20m+:

Countries:  
United Kingdom, Denmark,  
France, Germany and Ital.

## World leader chooses Dynamics AX to aid their global evolution...

**Ergonomic Solutions Group is a worldwide leader in the manufacture and supply of ergonomic technology mounting solutions for the retail industry. The company is headquartered in the UK and has subsidiaries in Denmark, France, Germany and Italy.**

AxPact member MW data were chosen as the preferred partner to implement Microsoft Dynamics AX across the entire business operation at Ergonomic Solutions Group. The decision by Ergonomic Solutions to partner with MW data was made mainly around two key factors. The first being that MW data had an excellent proven track record of working with manufacturing companies who export to sales subsidiaries around the world. The second being MW data's membership of AxPact enabled them to centrally manage the entire project and also offer support by local resource in other countries via the respective AxPact members.

**"In some of our countries, special country-specific requirements had to be implemented. MW data's close connection to all AxPact members enabled us and MW data to offer local support without letting go of the project management at any time."** explains Per Bjerring, Group Operations Director at Ergonomic Solutions.

Ergonomic Solutions Group recognised that if they wanted to achieve their ambitious multi-national growth strategy then they would need to replace the four disparate local business systems with one single integrated ERP solution. This solution would need to be a future-proof solution that effectively enabled their intercompany requirements and also met the varying functional needs of all operations within the respective businesses and countries. After a careful selection process they decided upon Microsoft Dynamics AX 2012 as the solution and MW data as their partner.

**"We chose Microsoft Dynamics AX 2012 because it meets all of our requirements from a functional and international perspective. It provides a platform on which we can grow and develop our business and that is extremely satisfying for us. Working with MW data and AxPact adds significant value because they know the product inside out and how to deploy it for an international business like ours. Our partnership with them has been a 100% positive experience."**

Per Bjerring concludes.
